I am a software developer looking for the company where i can grow and put all my skills to use. Team player with good communications skills, passionate about software development, and ready to work with an agile team of developers. In my time off from work i like to make content about software and continue to learn about about software through personal projects.

## WORK EXPERIENCE

### Developer TRIDigital Marketing

#### Achievements/Tasks

- Coordinated closely with UI/UX, Design, and QA, Prototyped and WireFramed
- Developed marketing clients sites using templates and custom sites
- Maintained legacy sites
- Interfaced new clients with GatsbyJS

## PERSONAL PROJECTS

### FlixMedia

- This is a multiple page application that renders Movies and TV media with all the details to go with it. And it allows for a guest session where you can rate and save/delete your favorite media. I am currently documenting a rebuild of this with protected routes and authentication that will allow for the user to save and rate media. Follow it on my channel!

### 100 algorithm challenge

- In my continued learning I decided to document my way to a 100 Algos with javascript.

### Recipe Central

- This app allows the user to search, save, delete, and edit recipes

### Free Movies

- Free Movies is a JQuery app and it pulls the free movies section from youtube.

### Deal flow

- Deal Flow allows you to keep track of your real estate deals and save them with LocalStorage.

## EDUCATION

### Computer Science North Hennepin Community College

## TECH SKILLS

Javascript

React JS

Redux JS

Jquery

HTML5

CSS3

Webpack

Babel

Bootstrap

Git

Wireframes

SCSS/SASS

Node JS

EXPRESS JS

## ACHIEVEMENTS

### Presenter/Speaker (11/2019)

*I had the opportunity to take part in presenting for a local meetup called Tech Talent South where the topic was a "how to" communicate with your Software team*
